Want to sell America's number one mini-dish and programming to the multiple dwelling unit (MDU) market? Go digital with DIRECTV System equipment and programming. No other programming service delivers the quality, value and variety offered by DIRECTV.

The MDU market includes more than 25 million apartments, townhomes, condos and co-ops throughout the nation. [Click here](#) for more information on how to sell the DIRECTV System and programming to the MDU market.

Property Owners and Managers

Entice new residents by promoting the availability of DIRECTV service at your property. Reduce rooftop and balcony clutter by providing your residents with DIRECTV® service through a common dish on your MDU rooftop. Your residents will enjoy the benefits of premium digital service and you'll see results.

- Retain satisfied residents
- Attract new apartment residents
- Enhance perceived property value.

An authorized DIRECTV Service Provider can design and construct a signal distribution system that fits your needs and size of your particular MDU. Each unit wired for DIRECTV can also receive access to local TV broadcasts. Visit our [Local Channels](#) page for more information.

Want the ability to offer your residents access to DIRECTV® service? For more information, please [email us](#) so we can answer any questions that you may have.

Apartment and Condo Residents

You don't need to own a house to get great satellite service!

Start by asking your landlord, property manager or homeowners association if you may install a DIRECTV® System on your rooftop. If not authorized to mount the dish on the roof, many apartment and condominium residents have the dish installed on a private patio or balcony. A clear view of the southern sky is required.

The Federal Communications Commission (FCC) has a rule that generally forbids local governments and homeowners associations from enforcing unreasonable restrictions regarding the installation of satellite dishes one meter or smaller. For more information visit the [FCC website](#).

However, your system installation may require structural modifications that may be limited or restricted by the terms of your lease/rental agreement. To avoid delays in your installation, we ask that you obtain written or verbal permission from your landlord, homeowners association or property manager (or, alternatively, you may review your lease/rental agreement/HOA CC&Rs to confirm that permission is not required) prior to scheduling your installation.
